- FuseFM
- YIP
- TruckerPal and ShipperPal
- Wingmatch
- Oosmo App
- Movers
- GAN
- Down
- Tool Tracker
- SpotGroup
- Gifted
- Vits
- Response

Project Description:

1. RiseSmart:

- **Concepts used:** Localization, MkMaps, FontAwesome, Ionicons, Twilio video Call.
- **Compatibility :** IOS11 above
- **Key Role :** Developed Opportunity module, Video Calling and the Events module
- **AppStore Link:**
- **Description :** This app is basically like a LinkedIn. It's a job portal where different- 2 company clients looking for the Resources for their employee in a field of their performance. They can buy packages of their requirements and they also provide the facility like coaches, telecommute, video calling, set targets etc and many more things.

2. Nunawading Assembly:

- **Concepts used:** Push Notification, Firebase, Google Drive api, Google Task api, Google Event api, AVPlayer.
- **Compatibility :** IOS11 above
- **Key Role :** Developed the whole application.
- **AppStore Link:**
<https://apps.apple.com/us/app/nunawading-assembly/id1473228776?ls=1>
- **Description :** This app is created for an Australian church. In which church member will notify by notification of the events, task and drive data share between their members.

3. MOOHQ:

- **Concepts used:** Push Notification, json Webservices, post notifications, stripe payment gateway.
- **Compatibility :** IOS11 above
- **Key Role :** Developed the whole application.
- **AppStore Link:**

<https://itunes.apple.com/us/app/moohq/id1448301518?mt=8>

- **Description :** This is e-commerce application through which you can order a meal, edit cart and done payment with credit cards.

4. **Fuse FM:**

- **Concepts used:** Push Notification, json Webservices, post notifications, AVPlayer, live streaming, Background audio play.
- **Compatibility :** IOS11 above
- **Key Role :** Developed the whole application.
- **AppStore Link:** <https://itunes.apple.com/us/app/fusefm/id1445019724?mt=8>
- **Description :** This is a live radio app.

5. **YIP:**

- **Concepts used:** Push Notification, json Webservices, Google Map, Place Api, Health Kit.
- **Compatibility :** IOS11 above
- **Key Role :** Developed the whole application.
- **Description :** This application is basically taking the health data of the user (height, weight calories) and update his profile. In this app you can see your yearly based data. Even you can challenge for weekly challenges like weight challenge, location challenge, move the challenge between your friends. Basically, this app use by the insurances company for selling their plans.

6. **TruckerPal and ShipperPal:**

- **Concepts used:** Push Notification, json Webservices, Google Map, Place Api, Signature.
- **Compatibility :** IOS11 above
- **Key Role :** Developed the whole application.
- **AppStore Link:**
ShipperPal link:
<https://itunes.apple.com/us/app/shipperpal/id1403232768?ls=1&mt=8>
TruckerPal link:
<https://itunes.apple.com/us/app/truckerpal/id1403232763?ls=1&mt=8>
- **Description :** These applications are basically for transportation type. Truckerpal is for trucker like uber driver application and Shipperpal here Customer can create the shipment same like uber side customer. In which I've implemented the google map for achieving this.

7. **Wingmatch:**

- **Concepts used:** Push Notification, json Webservices, chatting, Posting.
- **Compatibility :** IOS10 above
- **Key Role :** Developed the whole application.
- **App Store Link :** <https://itunes.apple.com/us/app/wingmatch/id1152831302?mt=8>
- **Description :** This application is basically a chatting application in which user chat within the application can able to wave a friend, block a friend and search a friend nearby and globally also on viewing other post or profile In this application user can post a status to his friend or globally.

8. **Osmo App:**

- **Concepts used:** Osmo device.
- **Compatibility :** IOS10 above
- **Key Role :** Developed the whole application.

- **Description :** This application is basically a DIY osmo device application. Integrate osmo sdk and through this we able to move osmo device, capture an image, create videos and manage the memory warning if it is out of memory.

9. **Movers:**

- **Concepts used:** Push Notification, json Webservices, Calendar Integration, Stripe, Hypertrack.
- **Compatibility :** IOS11 above
- **Key Role :** Developing whole application.
- **Description :** This application is basically a taxi application one application for driver side and one for the customer side and in this I used stripe payment gateway. By default, google map is shown. But once the ride has created then we switch to hypertrack map where we just pass the initial location and source location after. And it with show you the navigation view of the hypertrack.

10. **GAN:**

- **Concepts used:** Push Notification, json Webservices, calendar Integration, core data.
- **Compatibility:** IOS10 above
- **Key Role:** Developing the whole application.
- **Description:** This application is basically a goal achieving app through this app admin can see how their employees achieving their goals and how much effort are they are putting. You can add a daily task and monthly task. Application will remind you before starting your task. Using local notification.

11. **Down:**

- **Concepts used:** OCR Api , In-app Purchase , Local Notifications
- **Compatibility:** IOS7 above
- **Key Role:** Developed the whole application.
- **App Store Link:** <https://itunes.apple.com/cz/app/down-text-analyzer/id1185458729?ign-mpt=uo%3D5>
- **Description :** This is a basically a scanner app in which user can scan the screenshot of the chatting of the two user and through third party Api (freeocrapi)we get the result and through an algorithm we generate a result that a how much person is attracted toward yourself

12. **Tool Tracker:**

- **Concepts used:** JSON web services.
- **Compatibility:** IOS7 above
- **Key Role :** Developed the whole application.
- **App Store Link :** <https://itunes.apple.com/ph/app/tooltracker/id1174329471?mt=8>
- **Description :** This is basically application made in Danish language and in this application user purchase any tool that tool available of not that is managed from the admin panel if any person borrowed a tool then that tool will be added for that user but final permission get from the admin side and another person want that tool he can ask for the same but admin panel decide how much he left or not

13. **SpotGroup:**

- **Concepts used:** Push Notification, Core data
- **Compatibility:** IOS7 above
- **Key Role:** Developed the whole application.

- **Description:** This is a chatting application in which user can send the messages to a single individual or in a group also. In this application a user third party api get from php side and it's also has online and offline mode means offline I use CoreData framework through which user can see their previous chats also.

14. Gifted:

- **Concepts used:** Push Notification, json Webservices, calendar Integration.
- **Compatibility:** IOS8 above
- **Key Role:** Developed the whole application.
- **Description :** This application is basically a charity based in which user can create an event of particular date and he can invite his friends for the particular events and that user will be notified through notifications and that event is marked on the calendar 3rd party(FSCalender) with event mark below the date and other user tap on that event he will jump to that event in which he can pledge for the particular event and pay for an event through gateways(PayPal, credit card).
